

◆ PRODUCT INTRODUCTION:

The THRS series of Emergency Escape Breathing Devices (EEBD) are self-contained compressed air breathing protection devices, designed and manufactured to the requirements of latest standards. It can provide constant flow air for 15 minutes and above, easy to operate. After opening the decompression cylinder valve, put on hood and then can be used normally, no need other additional actions.

EEBD mainly used in ships, high-rise buildings, commercial places, transportation departments, etc. to escape in toxic, harmful, smog and oxygen-deficient environments. It is a high-performance personal protective device for protecting respiratory organs.

◆ PRODUCT PERFORMANCE PARAMETERS:

Model Number: THRS-15B

Usage: For escape only

Working time: ≥ 15 min

Air Cylinder: 3L

Material: Alloy steel

Weight: <9kg

Working Pressure: 210bar

Packing: 2 set packed in one carton

Approval: CCS/EC
